**Excellence in musculoskeletal ultrasound training**

**Intermediate Level 2 Shoulder Ultrasound Course  
13-14 September 2019 - Paris**

## Description

The aim of this two day course is deepening the ultrasound examination of the shoulder, in which probe positions are discussed from the basic course and expanded with additional in depth information or new positions. We will review the theory and practice ultrasound skills of several important osseous, cartilaginous, capsuloligamentous, myogenic, neurogenic, and vascular structures. We will not only have a look at normal anatomy, but also discuss some interesting pathology cases. To make sure that all level 1 and 2 shoulder ultrasound skills will be placed in the bigger framework of clinical relevancy, clinical reasoning and clinical decision making, we will discuss all anatomy, pathology and probe positions to the clinical examination. This course is totally evidence based, and of fantastic quality, and is a must-follow for all sonographers who work with shoulder patients.

## Pre-requisites

It is assumed that professional subscribing to this level 2 course have already completed successfully a basic or foundational MSK Shoulder ultrasound course AND apply their skills since at least three month in clinical practice (compulsory).

Having skills and/or knowledge related to the use of Colour Doppler is a plus that might ease your understanding and your progression during the course.

Contact us if you have any doubt and/or question.

## Trainers

### Marc Schmitz, MSc

Founder & CEO

Besides his work at SonoSkills, he has been involved as being the head, and building, of a Master of Science program dedicated to MSK ultrasound. Marc has published some articles in peer reviewed journals in the field of MSK ultrasound. He also wrote a book with technical extremity scanning guidelines.

## Learning Objectives

*In this course you'll*

- Deepened the ultrasound evaluation with intermediate level probe position.
- Study the normal anatomy and pathology with MSK ultrasound.
- Refresh the pathology of the shoulder.
- Recognize ultrasound pathology of the shoulder.
- Learn how to report a diagnostic ultrasound assessment.
- Complete online tests and summary.

## Course Set-up

- **seats** limited to **12**, more course quality
- maximum **3** participants **per system**
- **e-learning** included
- **13&14 Sept.**

**level 2 intermediate shoulder course**

## Course Language

English

## Course Location

Paris

## Price

€ 600.-
